Usage Terms and Conditions

BlueMap Marine Weather API

Provider	BlueMap Co., Ltd., 2F, 26 Eungubinam-ro 7beon-gil, Yuseong-gu, Daejeon, Republic of Korea
Service	BlueMap Marine Weather API (https://weather-api.bmap.kr)
Version / Effective	v1.0 / 22 October 2026

1. Acceptance

These Usage Terms and Conditions govern every use of BlueMap Marine Weather API ("Service") operated by BlueMap Co., Ltd. ("Provider"). By sending requests to the Service, directly or through the Blue-X connector, the user ("User") accepts these terms.

2. Permitted use

- Research, development, testing and demonstration activities, in particular within R&D; projects in which the Provider participates;
- Integration into the User's own systems (e.g. ECDIS, route planning, data-space services) for evaluation;
- Creation of derived products, provided that the attribution and licence conditions of the original data sources are respected.

3. Prohibited use

- Using the Service or its data as the sole basis for safety-of-navigation or other safety-critical decisions;
- Reselling or offering the Service itself (or a mirror of it) to third parties as a commercial service without written consent of the Provider;
- Sharing access keys, connector access URLs or credentials with unauthorised parties;
- Excessive, automated or abusive request patterns that impair the Service for other users, including attempts to bypass access control, probe for vulnerabilities, or overload the infrastructure;
- Any use that violates applicable laws or the rights of third parties.

4. Fair use

The Service runs on limited research infrastructure. Users should poll only as often as data are updated and prefer the latest-forecast package over repeated bulk requests. The Provider may throttle or block traffic that endangers system stability.

5. Access credentials

Where access is granted through Blue-X, the access URL is bound to the User's account and remains valid only while the User's Verifiable Credentials, session and data contract are valid. Users must keep these credentials confidential and inform the Provider without delay of any misuse.

6. Logging and data protection

For operational stability and security (error analysis and blocking abnormal access), the Provider records technical request metadata: timestamp, requested endpoint and parameters, response status, source IP address and client identifier where available. These logs are not used for profiling, are accessible only to the Provider's operators, and are not disclosed to third parties except where required by law.

Logs are retained only as long as necessary for these purposes. Users may contact the Provider regarding their data in accordance with the Personal Information Protection Act of the Republic of Korea.

7. Attribution

When publishing results based on the Service, Users should acknowledge the Provider ("Data processed by BlueMap Co., Ltd.") and the original data sources as required by their licences.

8. Suspension and termination

The Provider may suspend or terminate a User's access at any time if these terms are breached, if credentials or contracts expire, or if the Service is discontinued. Users may stop using the Service at any time.

9. Disclaimer

The Service and its data are provided "as is" and on a best-effort basis, without any warranty. To the extent permitted by law, the Provider accepts no liability for damage resulting from the use of the Service.

10. Changes, governing law and contact

The Provider may update these terms; each version is published at a versioned URL. These terms are governed by the laws of the Republic of Korea.
