Service Offering Terms and Conditions

BlueMap Marine Weather API

Provider	BlueMap Co., Ltd., 2F, 26 Eungubinam-ro 7beon-gil, Yuseong-gu, Daejeon, Republic of Korea
Service	BlueMap Marine Weather API (https://weather-api.bmap.kr)
Version / Effective	v1.0 / 22 October 2026

1. Scope

These Service Offering Terms and Conditions describe the service that BlueMap Co., Ltd. ("Provider") offers under the name BlueMap Marine Weather API ("Service") and the conditions under which it is made available to participants ("Consumers"). They apply together with the Usage Terms and Conditions of the Service.

2. Service description

The Service provides marine weather and ocean data through an HTTPS REST API. It includes:

- Collection of forecast and reference data from public sources (NOAA GFS / GFS-Wave, ECMWF Open Data, Copernicus Marine Service, GEBCO) on an automated schedule;
- Grid data queries returned in JSON format;
- Conversion of selected data into IHO S-100 based datasets (S-111 surface currents, S-413 weather and wave conditions) in HDF5, delivered as tiled files via download URLs;
- A latest-forecast package endpoint that returns the most recent complete forecast cycle as a ZIP archive.

Endpoints, parameters and formats are documented in the API documentation published by the Provider and may be updated as the Service develops.

3. Service status and availability

The Service is operated as a research and demonstration service within international and national R&D; projects (including ITEA4 Optimal-LOADS). It is provided on a best-effort basis. No service level agreement, guaranteed uptime, response time or data delivery schedule is offered.

Data availability depends on the upstream providers. Delays, gaps or changes in upstream data are passed through to the Service and are not the responsibility of the Provider.

The Provider may perform maintenance, change endpoints, or suspend the Service temporarily or permanently. Where practicable, Consumers will be notified in advance.

4. Access and eligibility

Access is granted to participants approved by the Provider, in particular R&D; project partners. Access may be brokered through the Provider's data-space connector (Blue-X), where the Consumer presents valid Gaia-X Verifiable Credentials and concludes a data contract before data is delivered.

The Provider may refuse, limit or revoke access at its discretion, including where credentials expire or the Usage Terms and Conditions are breached.

5. Fees

The Service is currently offered free of charge. Any future change to this condition will be communicated to Consumers in advance and will not apply retroactively.

6. Data origin and intellectual property

Source data remain subject to the licences and attribution requirements of the originating providers. Consumers are responsible for complying with those requirements when using or redistributing data.

The Provider retains all rights in the API, software, processing pipelines and the format of the derived datasets. Nothing in these terms transfers ownership of the Service to the Consumer.

7. Infrastructure and data processing

The Service is hosted on commercial cloud infrastructure (Amazon Web Services). Data are stored in object storage and a managed metadata database. For operational stability and security, the Provider records technical request

metadata as described in the Usage Terms and Conditions.

8. Disclaimer and limitation of liability

Data are provided "as is" without warranty of accuracy, completeness or fitness for a particular purpose. The Service is not an official hydrographic or meteorological service and must not be used as the sole basis for safety-of-navigation decisions.

To the extent permitted by applicable law, the Provider is not liable for any direct or indirect damage arising from the use of, or inability to use, the Service or its data.

9. Changes to these terms

The Provider may update these terms. Each version is published at a new URL with its version number, so that references to a specific version (including hash values in Gaia-X credentials) remain valid.

10. Governing law and contact

These terms are governed by the laws of the Republic of Korea.
